DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moriyama(US 4,680,647) in view of Lin et al.(US 5,659,399).

In claims 1,3, Moriyama discloses a method for inserting a start code into a modulation process in (col.1,lines 48-51). Moriyama disclose inserting a stop code in (col.1,lines 51-54). Moriyama does not specifically disclose subpixel modulation process.where code alters the placement of the spots to produce a sub-visual pattern identifying a print engine. Lin's patent discloses subpixel modulation process.where code alters the placement of the spots to produce a sub-visual pattern identifying a print engine in (col.3,lines 65-67; col.4,lines 1-5 and col.9,lines 54-60). It would have been obvious to person of ordinary skill in the art at the time invention was made to use subpixel modulation method taught in Lin with modulation process disclosed in Moriyama in order to provide high resolution image and improve the stability of the image when printed thus enhancing an overall picture quality.

In claim 2, Moriyama disclose code is repeated several times throughout a printed image in (col.35,lines 1-10).

In claims 4- 5, Moriyama disclose full and no modulation process in (col.33,lines 59-66).

In claims 6-7, Moriyama disclose inserting a start code modulation sequence of 11110011 and stop code modulation sequence of 0001111 in (col.16,lines 41-54).

Response to Amendment

2. Applicant's amendment necessitated new grounds of rejection. Please see rejections above.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
